How To Integrate Slack With easy.jobs

Integration · https://easy.jobs/docs/how-to-integrate-slack-with-easy-jobs/

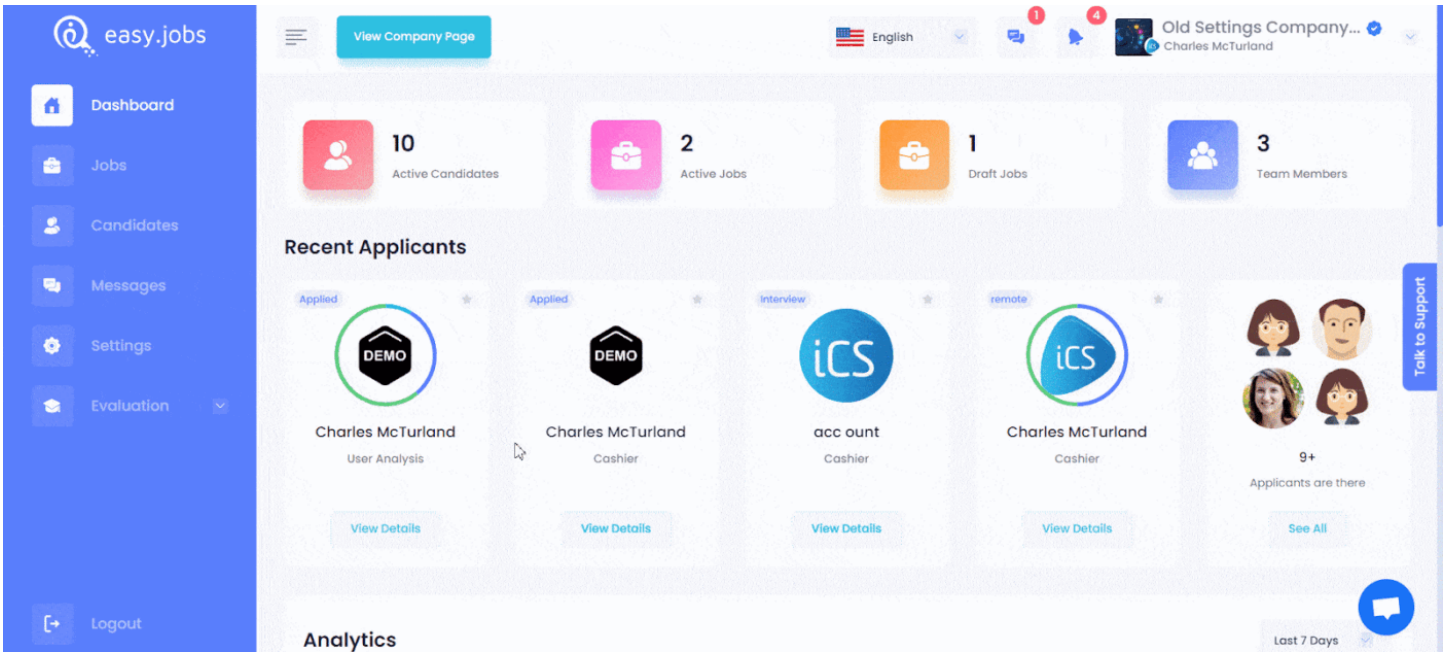

Integrating Slack with **easy.jobs** can help you to streamline your recruitment process. By connecting these two platforms, you can receive real-time updates on the recruitment process through easy.jobs on your Slack channels. Slack integration with easy.jobs can save time and increase efficiency.

How To Integrate Slack With easy.jobs

Follow the guidelines below to learn how to easily integrate Slack with easy.jobs in a few clicks.

Step 1: Configure Slack From The Dashboard

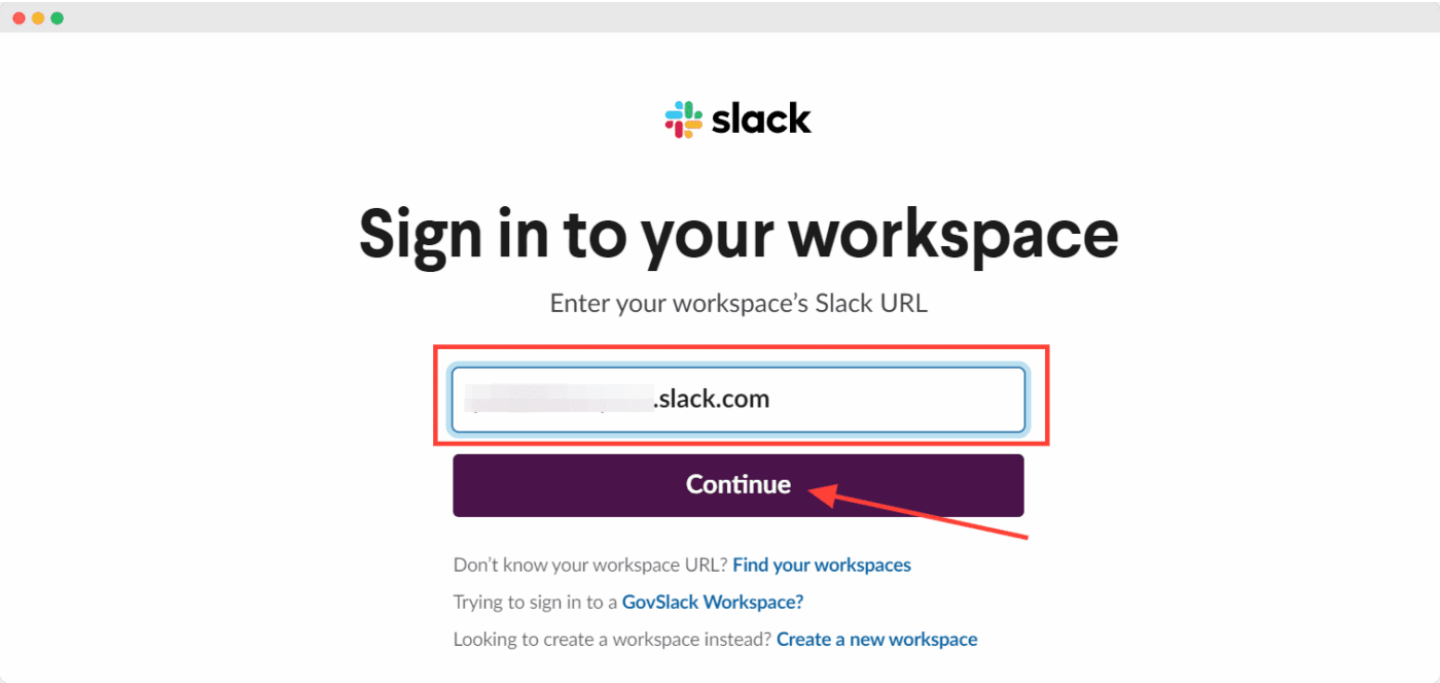

Sign in to your easy.jobs account with your credentials. From the dashboard, navigate to to **‘Settings** ’ → **Others → Integration.** Here, find **Slack** and click on the ‘**Configure**’ button. Then, click on the ‘ **Add to Slack**’ button.

Or, you can directly go to **easy.jobs App For Slack** page and click the ‘**Add To Slack**’ button before following the steps below.

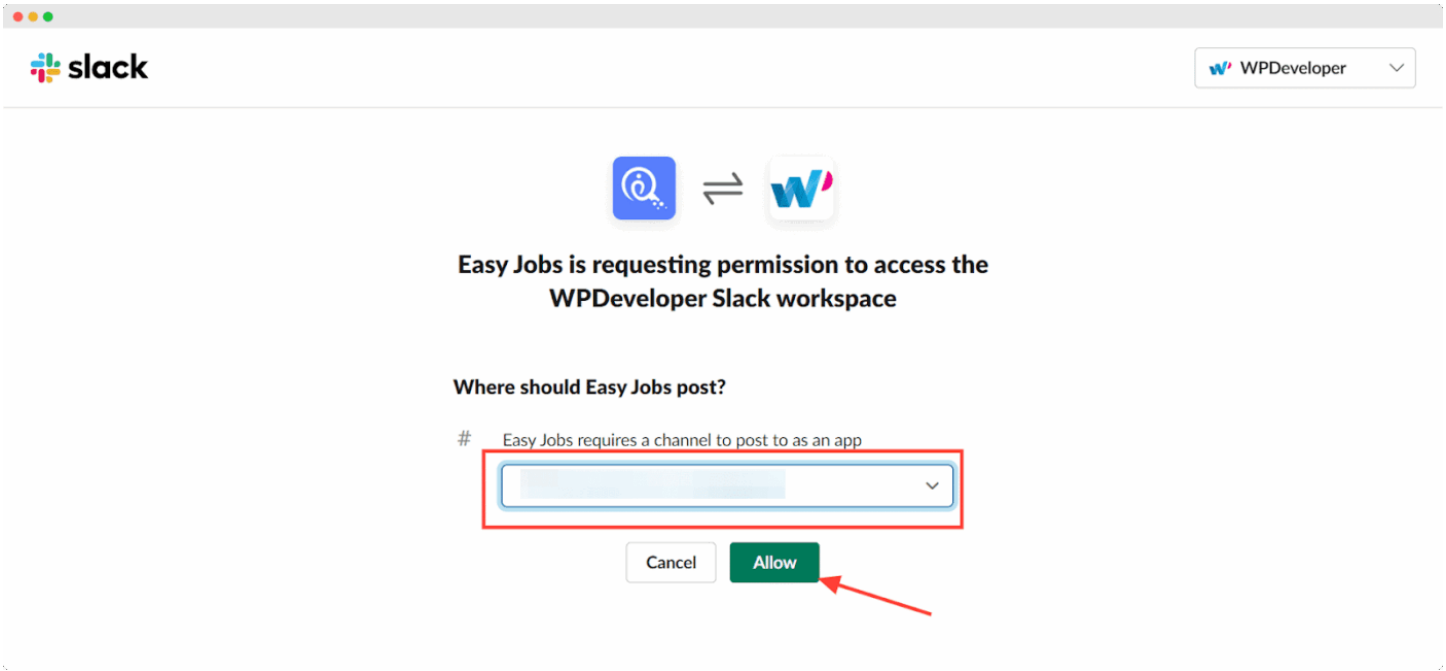

Step 2: Connect With Slack By Signing In To Workspace

Enter your **workspace's Slack URL** into the input field and click the '**Continue**' button on the screen that appears.

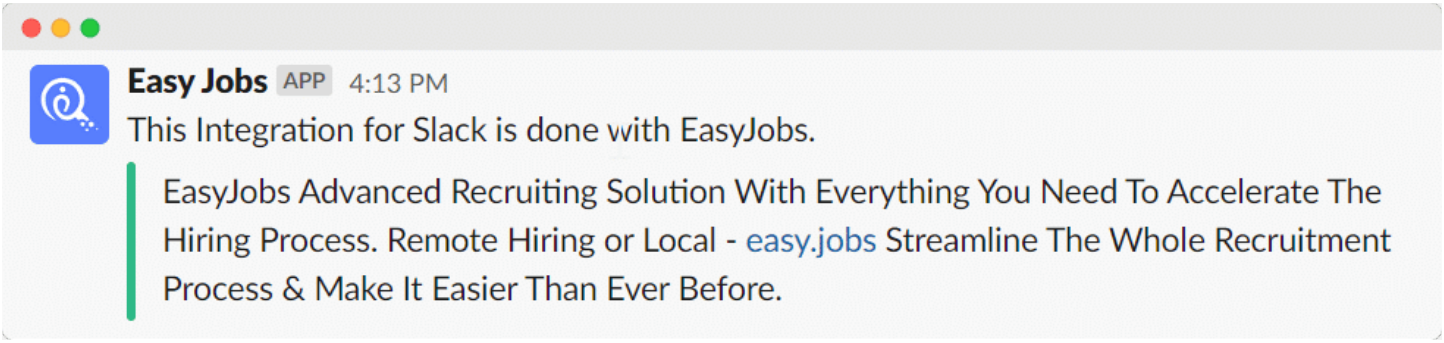

Step 3: Allow Permission To Access Slack Workspace

Select a channel to post to as an app from the '**Where should Easy Jobs post?**' dropdown menu and click allow. This will be the Slack channel where all the notifications of the recruitment process will appear in real-time.

After the integration is complete, you will get a confirmation notification on the Slack channel, as shown below. And, from now on, you will get every notification of your easy.jobs in that channel.

Thus you can easily integrate Slack with easy.jobs.If you need any help, feel free to **contact us** or join our **Facebook community** to get connected with other company owners like yourself.
