How To Verify Your Company Profile Using easy.jobs?

Account Setup · https://easy.jobs/docs/verify-your-company-profile/

Easy.jobs lets you give that facility to verify your company profile with a simple verification process. To do that quickly, you have to follow a step by step guidelines and make your company verified to recruit the best talent faster below:

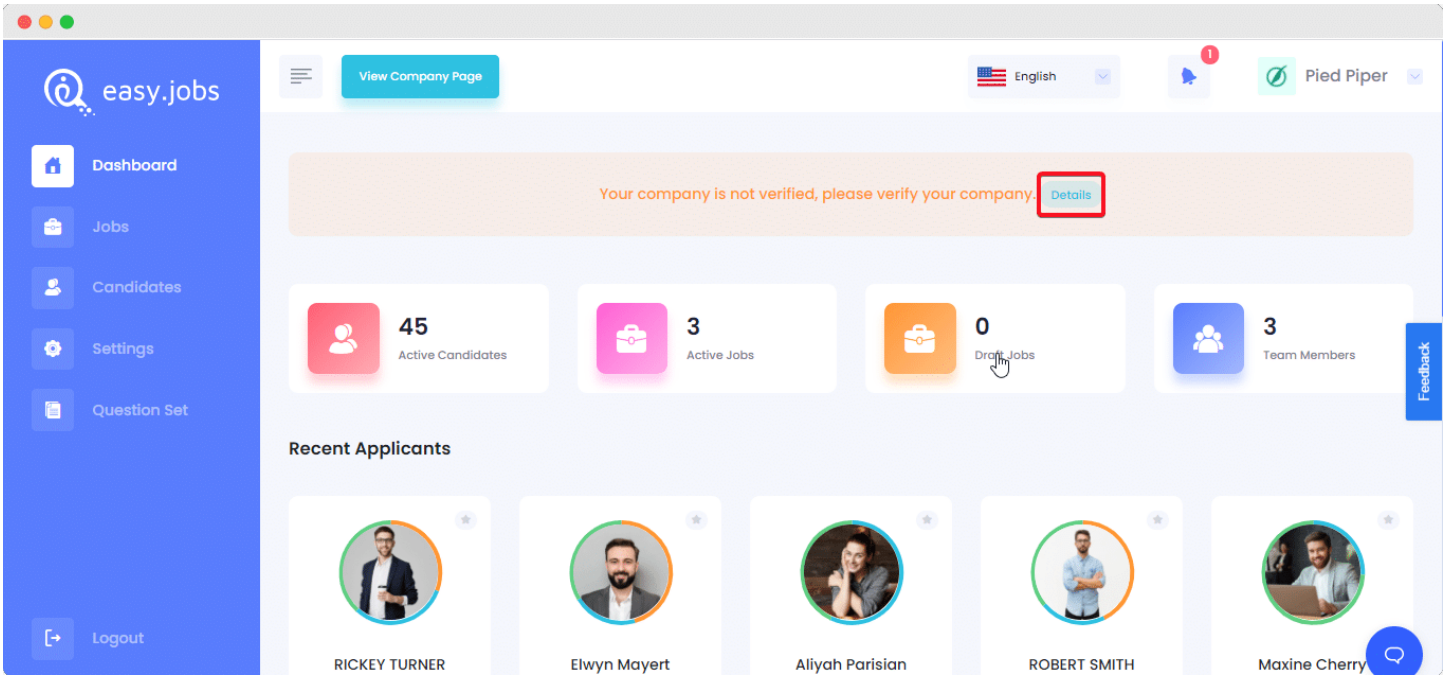

Note: *You have to verify your company link with a valid URL using Easy.jobs to make your organization credible and trustworthy among your potential employees.*

LEARN WHY SHOULD YOU VERIFY YOUR COMPANY PROFILE USING EASY.JOBS

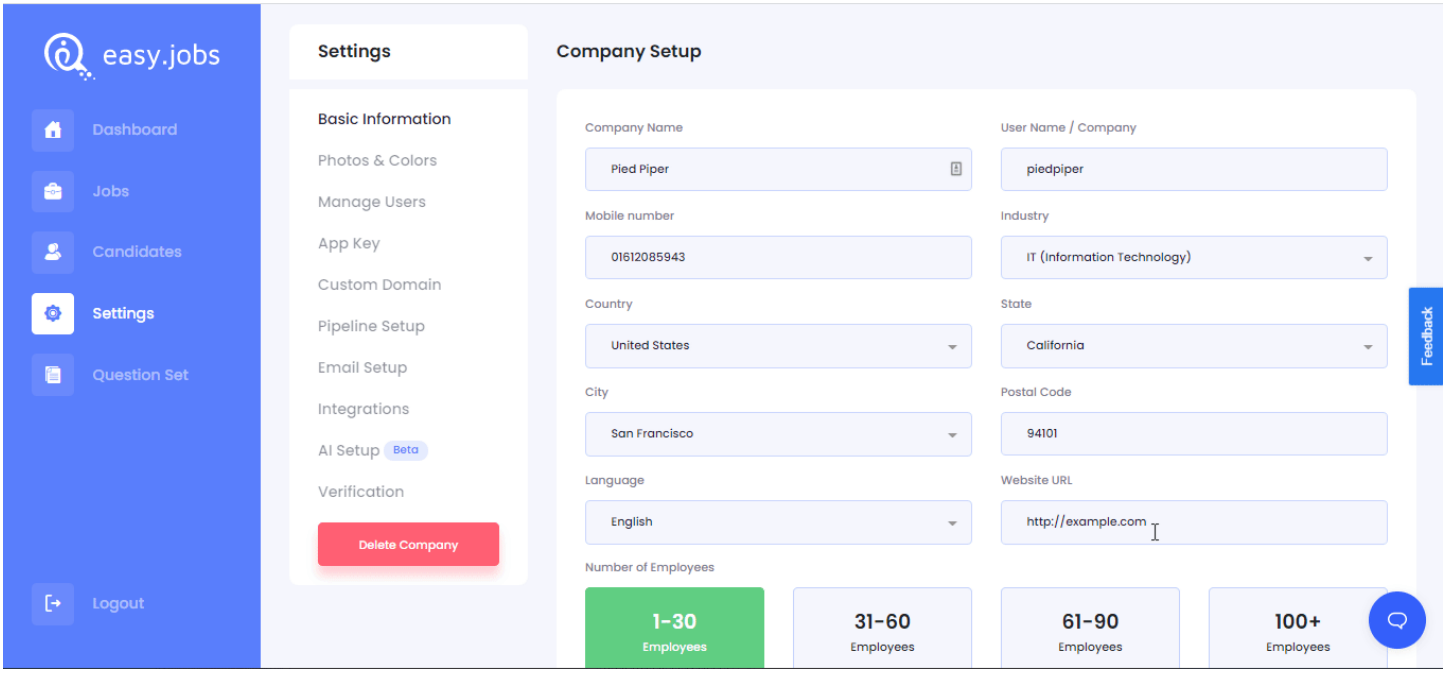

Step 1: Click On Easy.jobs Verification Message

You have to first **‘Sign In’** to your Easy.jobs account, and if you didn’t create any, then first **‘Sign Up’** to create an Easy.jobs account by following the steps of this **documentation** and logging in.

As you have logged in to your **Easy.jobs account**, you will now get a company verification message whatever sections you may click before verifying your company URL. So first, click on the **‘Details’** button that comes with the verification message.

It will redirect you to the **Easy.jobs → Settings→ Basic Information** section, where you have to insert your organization authorized domain link in the **‘Website URL’** section. Afterward, you have to just hit the ‘Save & Continue’ button to proceed further.

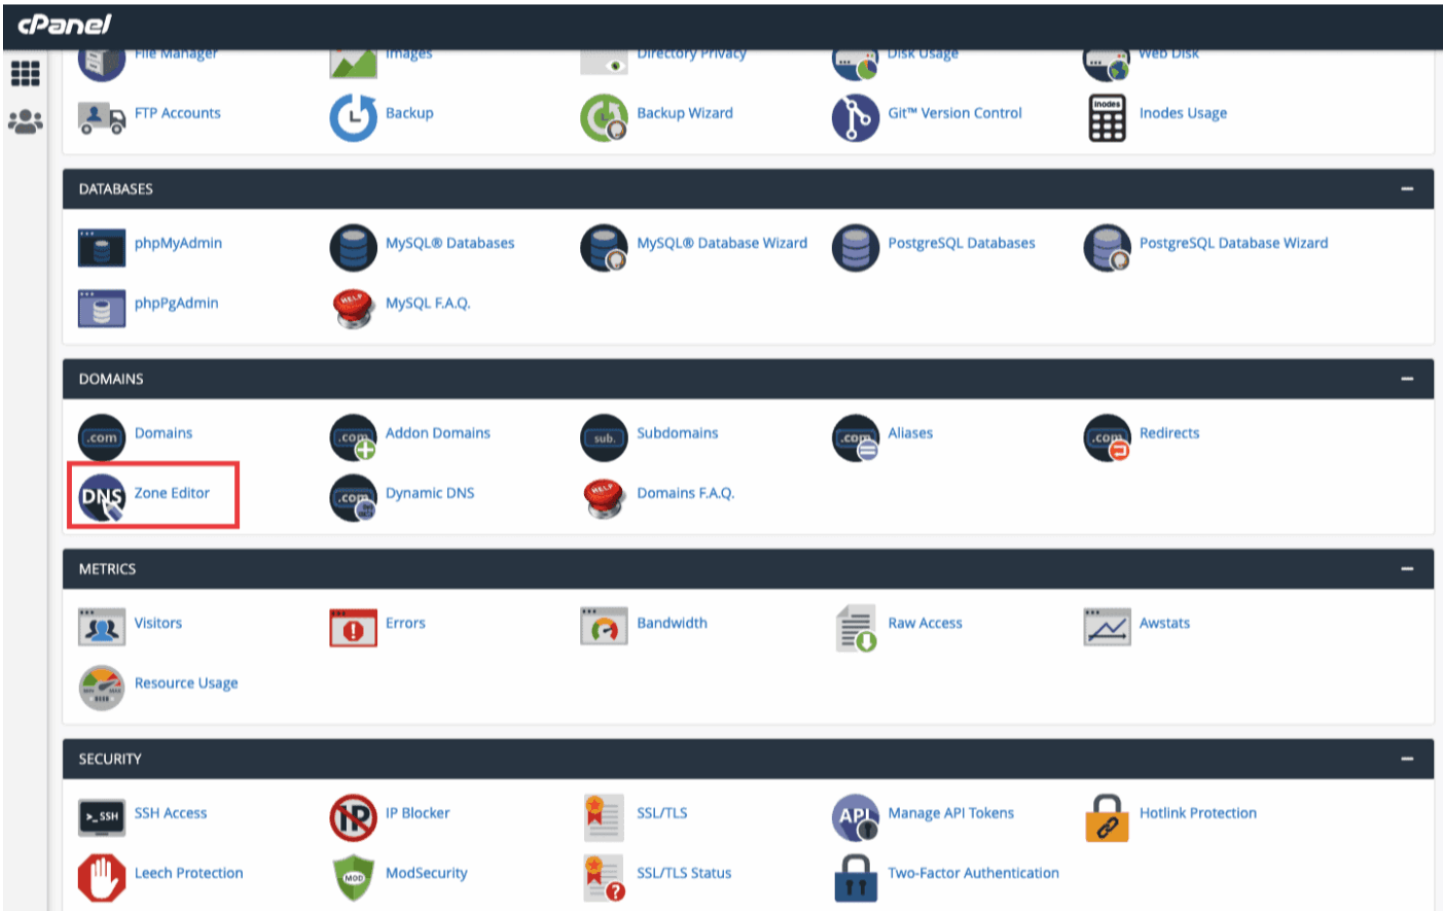

Step 2: Complete Verification Process For Your Company Profile

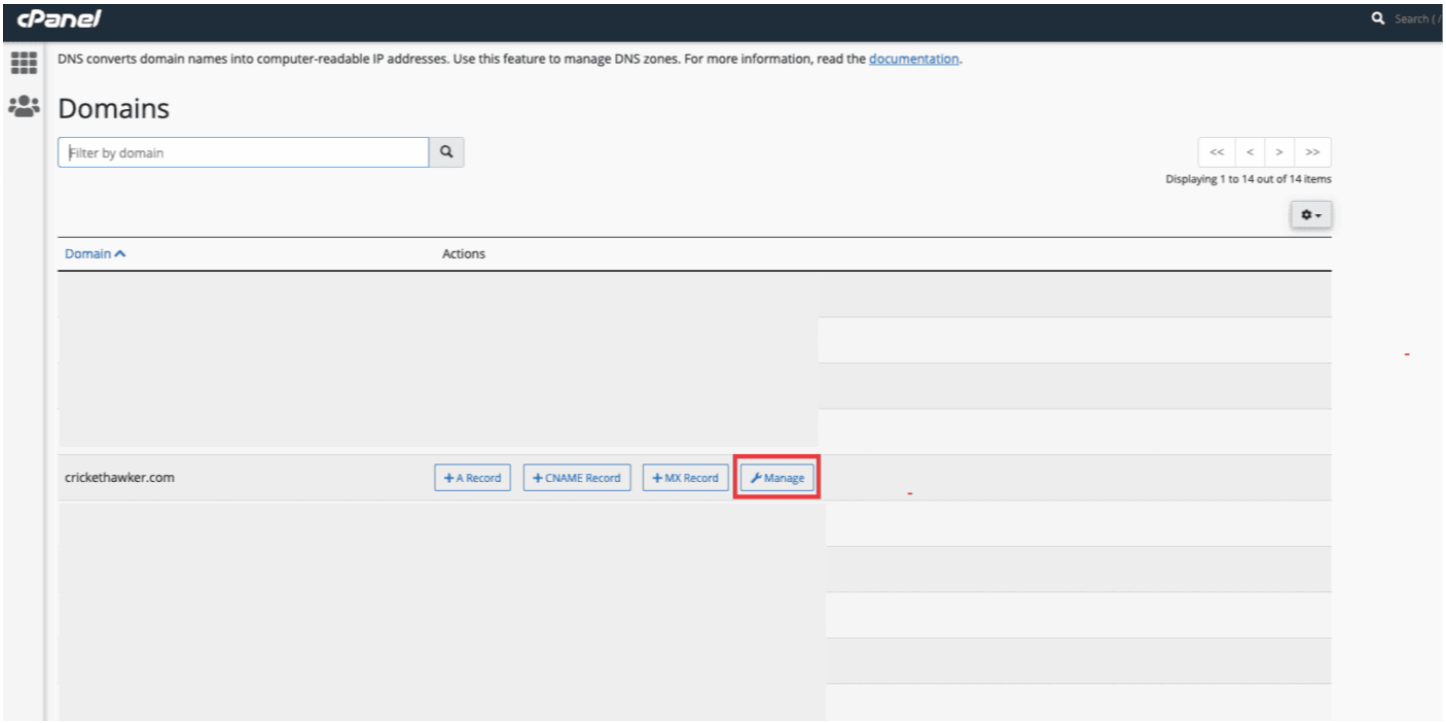

Once you have entered your company valid link, now you can complete your full verification process by navigating to the **Control Panel** of your hosting server.

***Note:** This is just an example and it may vary depending on the **different hosting service providers** of your website. To make it more clear two examples are given below.*

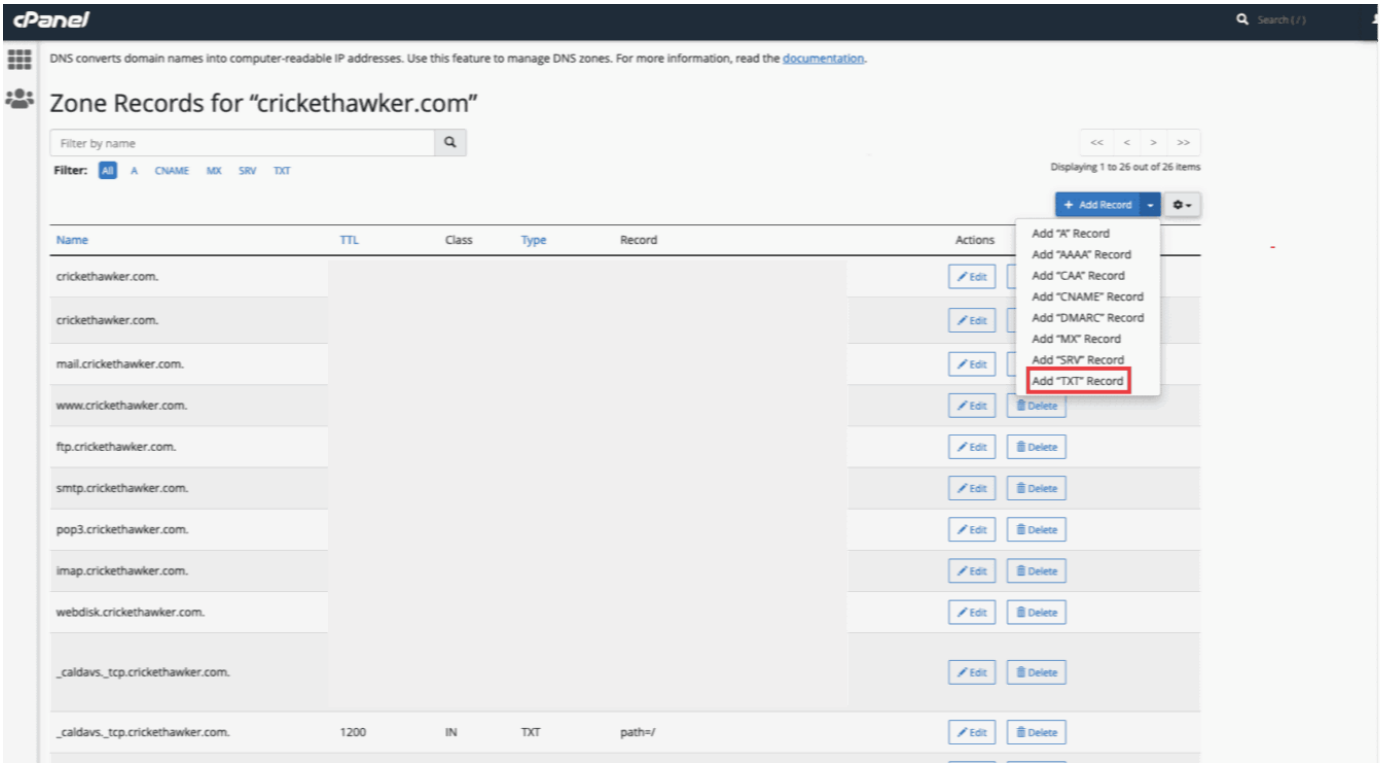

Example 1: Here you are going to see the configuration of your **CPanel** domain verification process for easy.jobs. First, navigate to **CPanel Domains → Zone Editor.**

Afterward, click on the preferred domain that you want to configure and hit the **‘Manage’ button.**

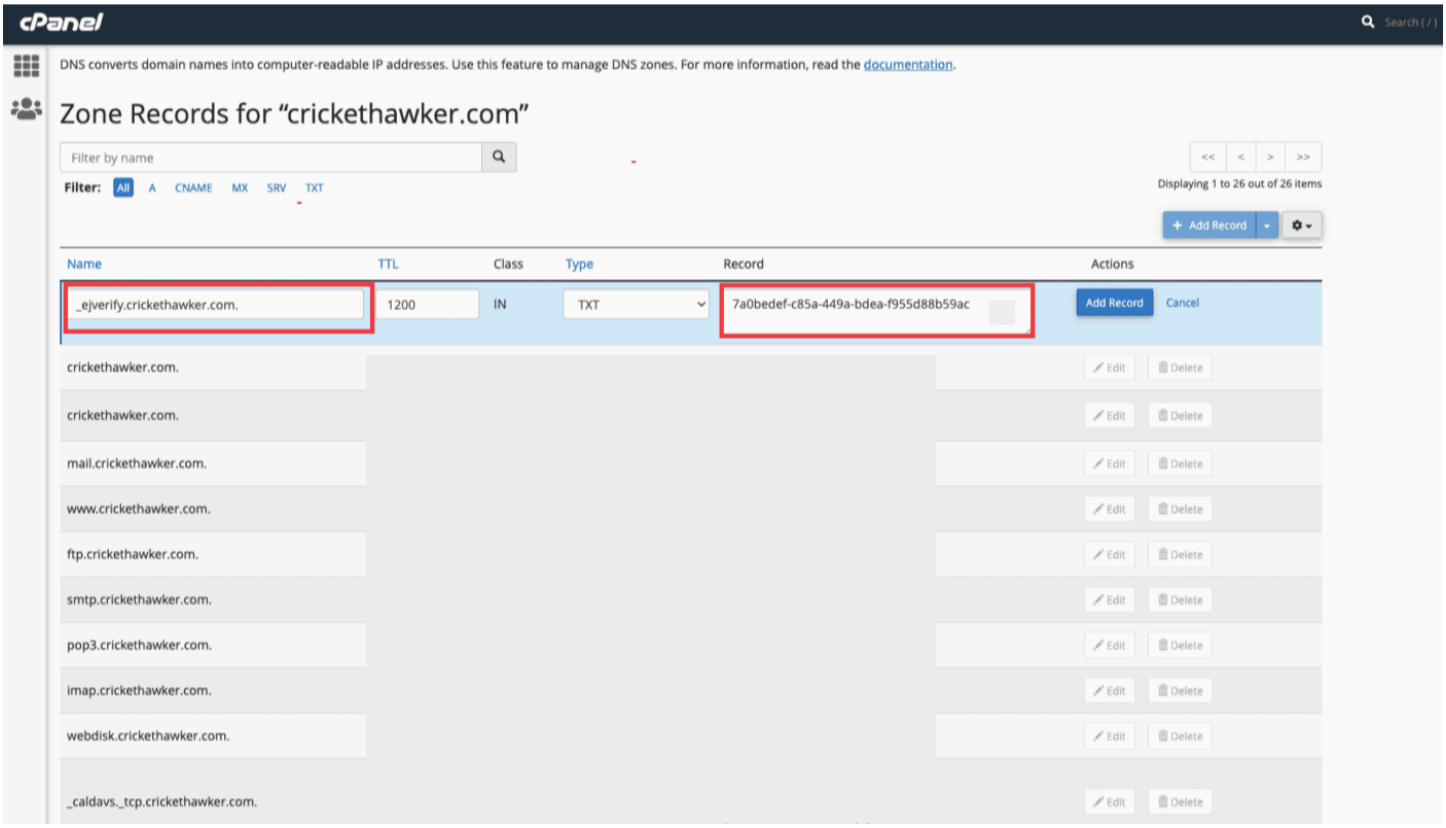

Now, head over on the right top **Add Record → Add "Text" Record** option and it will redirect you to your domain records section.

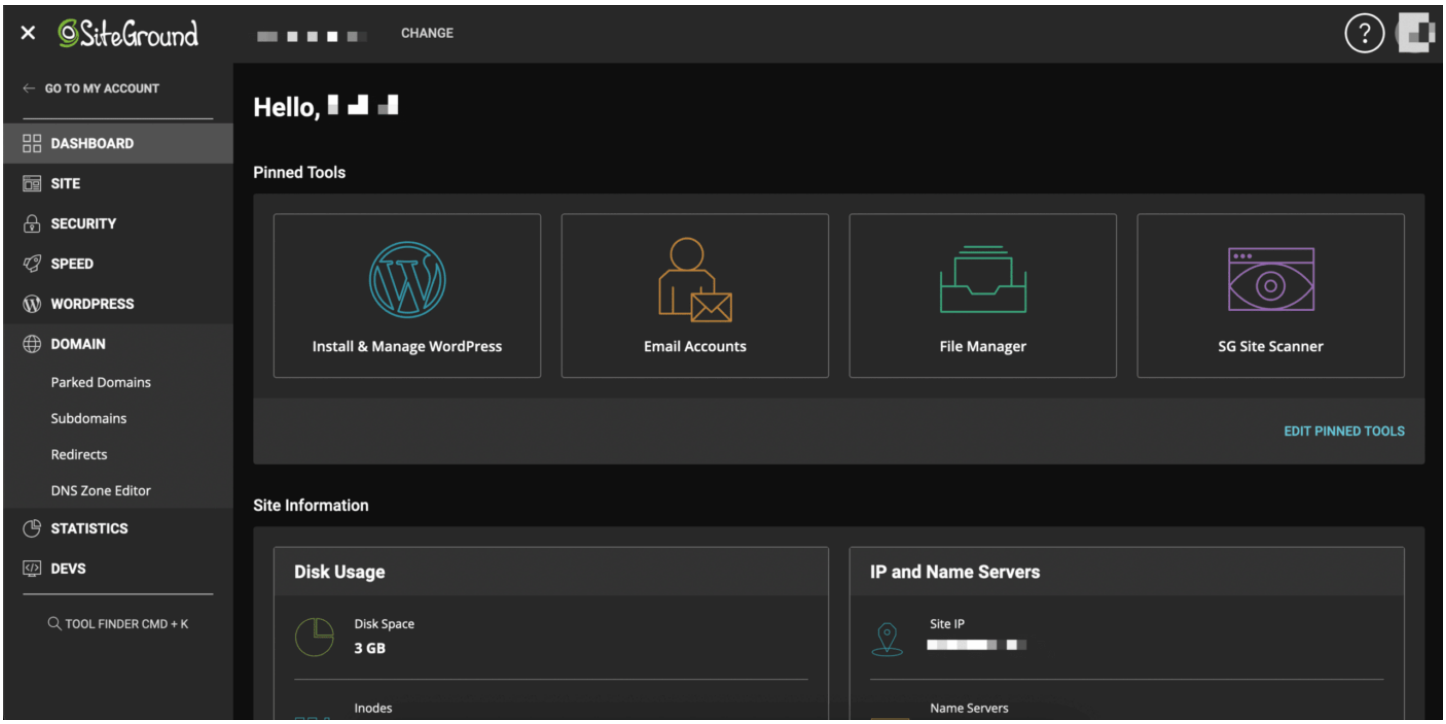

To complete this configuration, you have to go back to your Easy.jobs dashboard **'Verification'** section. Copy & paste the **Name** "_ejverify" and **Record** "437ccfa0-4a7c-4e46-8e73-2730f8ecb38e" that is mentioned in the 'Verification' dashboard.

Now just press the **‘Add Record’ button** to complete configuring your domain from your cPanel.

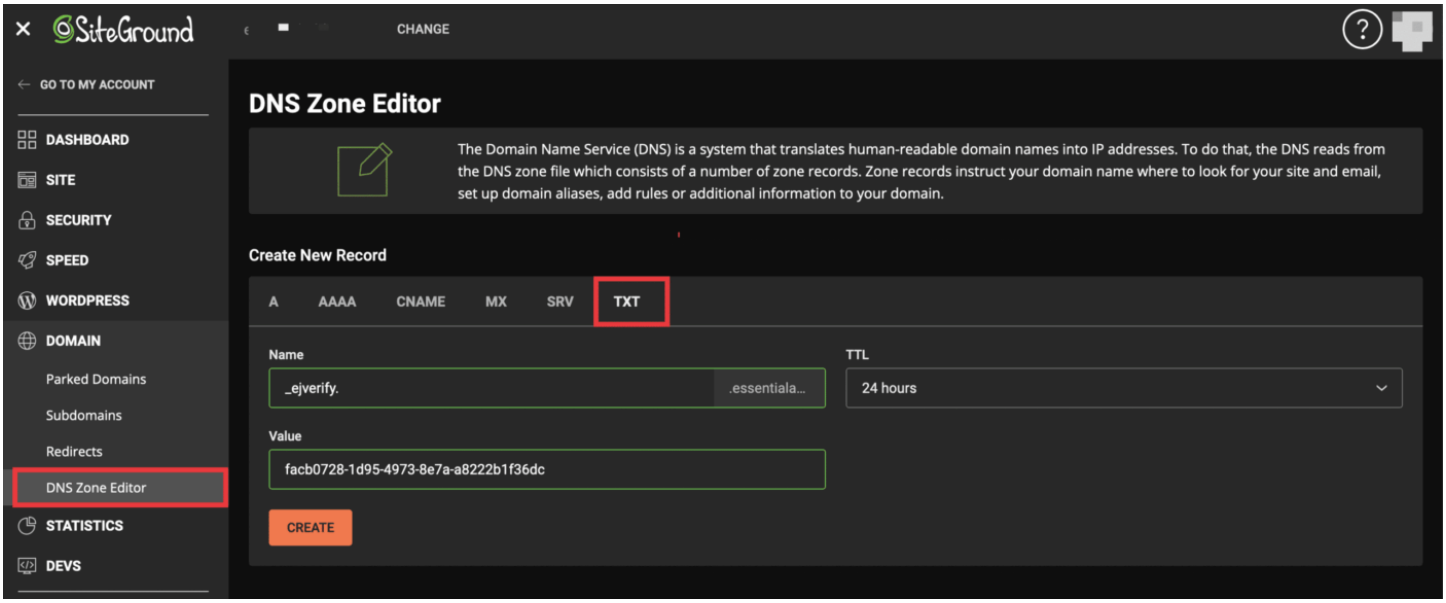

Example 2: Another example of a **SiteGround Control Panel** to verify your domain for Easy.jobs.

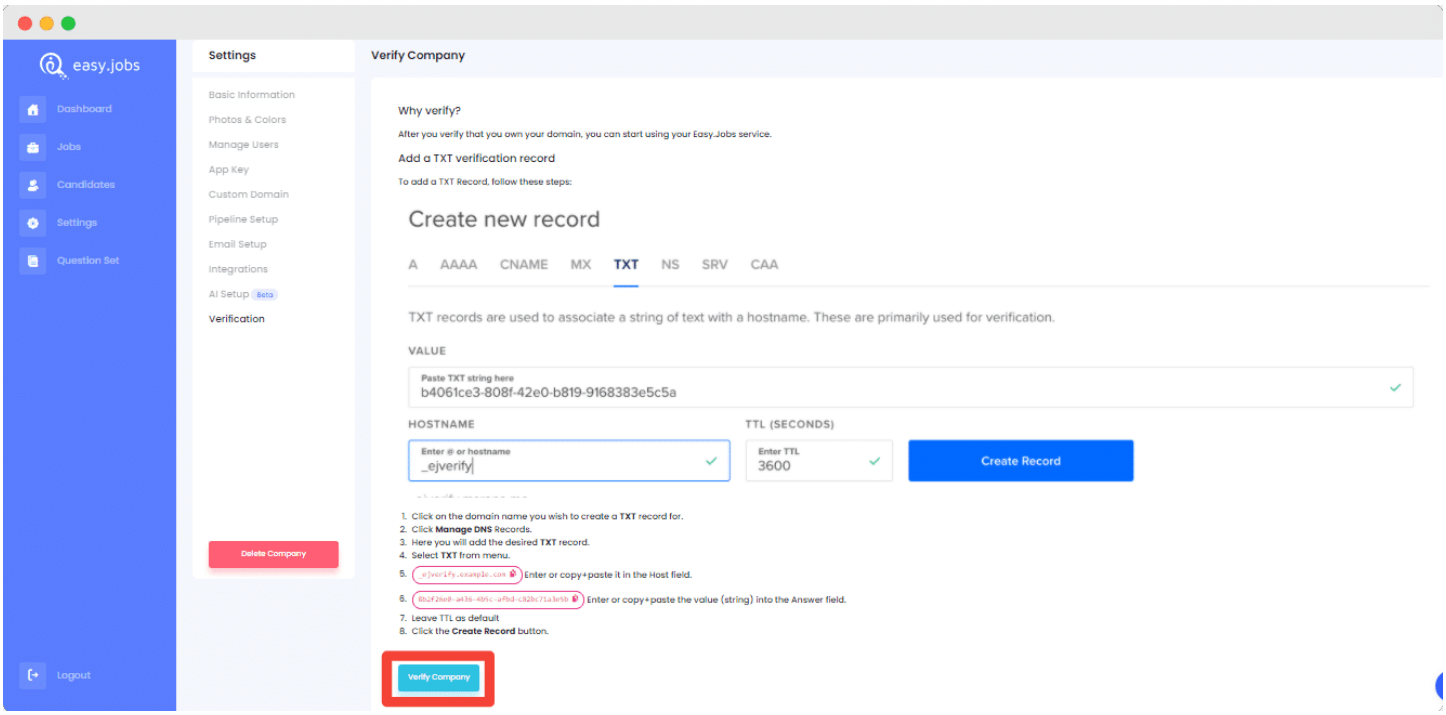

After navigating to your SiteGround control panel, click on the **‘DNS Zone Editor’** to add **‘TXT’** verification records. To complete this configuration, you have to go back to your Easy.jobs dashboard **‘Verification’** section.

Copy & paste the **Name** “_ejverify” and **Value** “437ccfa0-4a7c-4e46-8e73-2730f8ecb38e” that is mentioned in the ‘Verification’ dashboard. Now just press the **‘Create’ button** to complete configuring your domain from your CPanel.

After making all the changes, again go back to your Easy.jobs **‘Verification’** section and click on the **‘Verify Company’ button** to complete the full verification process from both ends.

That’s how easily you can complete the verification process to make your company profile easily authorized by **Easy.jobs** and successfully continue your remote hiring process with this easiest recruitment SaaS solution. Moreover, if you have **verified your custom domain** previously, then you won’t need to verify your company separately in Easy.Jobs. Your company will be verified automatically in Easy.Jobs.
